

Lumina II

Super Power Output

POWEROY ENERGY advanced N-Type cells combined With MBB and high-density encapsulation provides ultra-high power output

High Reliability

Excellent harsh tests results and advanced half-cell tech improve product reliability for long-term life cycle

Extra power generation

N-type wafers and cells bring ultralow LID&LeTID degradation, less than 1% 1st year degradation guaranteed, in addition lower temperature coefficient and better weak-light response provide extra power generation

High ROI

Bifacial power generation reduces BOS and system LCOE dramatically, promoting the project ROI
